

MEMORANDUM FOR: Deputy Director/Intelligence

SUBJECT: [REDACTED] Trip Report (Enclosed)

1. [REDACTED] enclosed report on foreign travel included five recommendations on page 11.

2. Recommendation A suggested assistance to Geographic Attaches in supplying samples of new materials utilized in U.S. cartographic work. Such assistance has been periodically given in the past and will be continued on a somewhat expanded scale.

3. Recommendation B suggests that we send a cartographer to study terrain shading and other specialized techniques under the tutelage of [REDACTED]. We feel that a member of the Cartography Division, [REDACTED] is highly qualified and that the Agency would profit greatly from such training. We plan to take advantage of this offer approximately a year from now.

4. Recommendation C suggests that we send a cartographer to attend the International Cartography Course conducted in Switzerland during the spring of 1957. An application was forwarded to the Director of the Institute some time ago and O/IR has now approved such training for [REDACTED], chief of one of the branches of the Cartography Division.

5. Recommendation D suggests sending a letter of appreciation to [REDACTED]. Such a letter was drafted by the Special Assistant for Maps, Department of State, and has been forwarded.

6. Recommendation E suggests supplying certain sample cartographic materials to selected mapping installations abroad. This is normal procedure and the enclosed report will provide guidance for future transmittals. Samples of plastic models have already been cleared by AMS for forwarding to [REDACTED]
